3 great systems, combined in 1 high-quality product

Revolutionary kiosk

The CUBOX captivates with its out-standing design and functionality. Use it as a bar, food stall, info-point, pop-up store, and much more.

Ecofriendly solar power station

PV-panels on the roof and lateral flaps generate solar power. High-performance batteries store the electricity to ensure a maximum of independence. No noises or exhaust fumes are produced during operation.

Mobile unit

A CUBOX is extremely easy to transport, to start-up and to operate. It can be placed virtually anywhere, as long as there is sunshine and sufficient space.
